

CyberShield: Incident Response Simulator

START

Create three difficulty levels:

Easy

Medium

Hard

Create 20 cybersecurity incidents for each difficulty level.

Each incident contains:

Incident description

Four answer choices

Correct answer

Create variables:

Score

Current incident

Selected difficulty

Timer

Incident number

Display the Start Screen.

Display three difficulty options:

Easy

Medium

Hard

Wait for the player to select a difficulty.

When the player selects a difficulty:

Save the selected difficulty.

Load the 20 incidents for that difficulty.

Shuffle the incidents into a random order.

Set the score to 0.

Set the incident number to 1.

Display the first incident.

FOR EACH INCIDENT:

Display:

Incident description

Four answer choices

Current score

"Security Incident [current number] of 20"

Set the timer based on the selected difficulty:

If Easy:

Set timer to 20 seconds.

If Medium:

Set timer to 15 seconds.

If Hard:

Set timer to 10 seconds.

Start the timer.

Wait for the player to choose an answer.

IF the player selects an answer before the timer reaches zero:

Stop the timer.

IF the selected answer is correct:

Increase the score by 1.

Display:

"Incident Resolved"

Play the correct-answer sound.

ELSE:

Display:

"Security Breach"

Play the incorrect-answer sound.

ELSE IF the timer reaches zero:

Display:

"Time's Up! Threat Escalated"

Play the incorrect-answer sound.

Disable the answer choices.

Display the Next Incident button.

When the player clicks the Next Incident button:

Increase the incident number by 1.

IF there are incidents remaining:

Reset the timer.

Display the next incident.

ELSE:

End the game.

END GAME:

Stop the timer.

Display:

Final score out of 20.

IF the score is 14 or higher:

Display:

"Mission Successful!"

"Company Secured"

ELSE:

Display:

"Mission Failed!"

"Company Compromised"

Display the Restart button.

When the player clicks the Restart button:

Reset the score.

Reset the incident number.

Reset the timer.

Return to the difficulty selection screen.

END
